

Lighting by Color

Presented by:

Evans Brown

Modern Lighting meets creative consciousness within the rapid pace of modern day filmmaking. Evans Brown will lead this deep dive into the practicalities of Quasar Science products on set and how they translate to on screen. This seminar will cover how Quasar Science was formed and where the company came from.

An introduction and explanation of the Quasar Science Rainbow product line and the RGBX color control technology.

We will explore

- How the Rainbow products can help benefit a user in not only grading on set but also how grading of light effects your live grade potential.
- How color curves are affected in camera and with lighting.
- What is Silver Light
- Controlling sodium vapor with new technologies
